

At Pink Care, we understand that everyone's care needs are different. That's why our pricing is flexible and based on an individual assessment depending on the level of support required.

We provide a wide range of personalised services, including companionship, personal care, shopping support, assistance with medication, accompanying clients to hospital or medical appointments, light housekeeping, and general domestic support. Each care plan is tailored to promote comfort, independence, and wellbeing at home.

Following a free consultation and care assessment, we provide a clear and personalised quote. We work closely with clients and their families to find practical, affordable solutions while maintaining the highest standards of care and flexibility to meet individual circumstances.
